

AGUNG ARIMBAWA

Production Manager | Process Engineering Manager | OEE | Manufacturing Improvement

Bandung Regency, West Java | +62 821 1827 6538 | great.arimbawa@gmail.com

PROFESSIONAL SUMMARY

Manufacturing improvement professional with 10+ years of experience across process engineering, production operations, process control, and quality control in electronics assembly and paint/coating manufacturing. Proven record in improving output, capacity, OEE, downtime, missed process, rework, and cost through RCA, CAPA, Lean methods, KPI control, system standardization, and cross-functional execution.

SELECTED OPERATIONAL ACHIEVEMENTS

- Improved laptop assembly output from 1,200 to 1,700 units/day (+42%) and increased capacity per line from 420 to 630 units/day/line (+50%).
- Reduced missed process from 1.25% to 0.07% (-94%) and rework/NG from 2.00% to 0.24% (-88%) through RCA, CAPA, TFT formation, and process standardization.
- Reduced downtime from 79.2 hours to 3.4 hours (-96%) by improving material checking, planning control, and abnormality response.
- Improved OEE from 69.4% to 85.2% (+15.8 points) and reduced cost per unit from Rp28,591 to Rp23,393 (-18.2%).

CORE COMPETENCIES

Process Engineering: OEE, cycle time study, line balancing, bottleneck analysis, process flow improvement, standard work, layout improvement

Operational Excellence: Lean Manufacturing, Six Sigma, Kaizen, waste reduction, productivity improvement, cost reduction, continuous improvement

Problem Solving: RCA, 5 Why, Fishbone, CAPA, risk assessment, troubleshooting, abnormality handling, TFT coordination

Production Control: manpower planning support, production scheduling support, shop-floor control, skill matrix, training control, KPI tracking, QC checkpoints

PROFESSIONAL EXPERIENCE

Process Engineer | PT Tera Data Indonusa Tbk (Axioo) | Jakarta

Jan 2025 - Present

- Lead process engineering improvements across laptop assembly operations, including process flow, line readiness, manpower allocation support, tooling readiness, QC checkpoints, and corrective action execution.
- Improved daily output from 1,200 to 1,700 units/day and increased line capacity from 420 to 630 units/day/line by optimizing process flow, production readiness, manpower utilization, and operating standards.
- Reduced missed process from 1.25% to 0.07% and rework/NG from 2.00% to 0.24% through RCA, CAPA execution, TFT formation, standardization, and defect escalation routines.
- Reduced downtime from 79.2 hours to 3.4 hours and improved OEE from 69.4% to 85.2% by strengthening material checker controls, material readiness, and operating discipline.
- Reduced cost per unit from Rp28,591 to Rp23,393 through cost reduction initiatives, process optimization, and production efficiency improvement.
- Supported 2026 KPI tracking, including Capacity NBAX average of 455.68 units/day/line against a 420 target and missed process maintained below the 0.25% target during Jan-Apr 2026.
- Developed production portal concepts and control routines for attendance visibility, absence tracking, skill matrix history, production monitoring, and management reporting.

Production Manager | PT RekaLagam | Sukabumi, West Java

Sep 2022 - Dec 2024

- Managed production planning, daily execution, output control, manpower arrangement, material planning, purchasing coordination, cost estimation, budget input, and cross-functional follow-up.
- Scaled production output from 200 g/day pilot-level production to 25 kg/day operating output by supporting machine purchase, manpower setup, production method control, and process stabilization.
- Reduced production cost from Rp1,011/gram to Rp93/gram (-91%) through scale-up, resource optimization, material control, and production cost discipline.
- Worked with Marketing and R&D teams to support new product initiatives, production feasibility review, quality standards, safety requirements, and management reporting.

Process Engineer | PT Rajawali Hiyoto | Cimahi, West Java

Aug 2017 - Aug 2022

- Improved paint/coating production output from 2.0 tons/day to 2.25 tons/day (+12.5%) without additional machines by improving work methods and production flow.
- Reduced process nonconformities from 96 cases/year to 6 cases/year (-94%) through RCA, corrective action, and process standardization.

- Provided technical support during process deviations, quality issues, equipment-related problems, and abnormal operating conditions.
- Reviewed workflows, identified improvement opportunities, established project schedules, monitored milestones, and supported technical documentation.

Process Control | PT Rajawali Hiyoto | Cimahi, West Java

Jun 2015 - Aug 2017

- Maintained process control documentation, updated procedures after process changes, and supported shop-floor process discipline.
- Performed product checking, rework support, measurement activities, and official recording using tools, gauges, instruments, and equipment.

Quality Control Intern | PT Kino Kosmetik Indonesia | Sukabumi, West Java

Nov 2014 - Feb 2015

- Maintained quality test records, checked raw materials and finished goods, reviewed data accuracy, and escalated quality concerns to supervisors.

EDUCATION

Bachelor of Engineering, Industrial Engineering - Universitas Jenderal Achmad Yani, Bandung | 2022

Vocational High School, Chemical Analysis - SMK Negeri 13 Bandung | 2015
